VICTOR OKOYE – Full-stack Software Developer

GitHub – victorokoye.app – linkedin - victor.c.okoye@gmail.com – +2348028845693

Experienced full-stack developer with over four (4) years of experience. Successfully helped boost the automated running of a company by about 25% through the building of an ERP system for the company. Aiming to apply my expertise in web development to help a dynamic company create good software to achieve excellent UIs and user experiences, drive innovation and achieve its growth objectives.

SKILLS

HTML, CSS, JavaScript, React.js, Next.js, Python, Django, MongoDB, MySQL, Git, Docker

PROJECTS

EktroMart   **Next.js, Typescript, TailwindCSS, MUI, Clerk**

An online mini store specifically for electrical/electronic devices. It is built with Next.js, Typescript, TailwindCSS, MUI, and Clerk. It is very user friendly and responsive. It is an ongoing project that is aimed at helping make all forms of transaction much easier. Preview   Github link

Scrutz   **Next.js, Typescript, TailwindCSS, MUI, MongoDB**

A campaign management application built with Next.js, Typescript, TailwindCSS, MUI, and MongoDB. It is very user friendly and responsive. Preview   Github link

Maneja   **React.js, Typescript, SASS, MUI**

A user-friendly, fully responsive project management app that makes life easy for users. Its Kanban drag-and-drop feature and display options make work really easy and time saving for users. It's very intuitive and seamless to use. Built with React.js/ Vite/TailwindCSS/MUI for the frontend, and Python/Django/Django Rest Framework for the backend. Github link

EXPERIENCE

Australian Contract   **Full-stack Developer (April – July 2024)**

This is an Australia-based contract in which I did mostly web scraping, managing and updating the company's private web/desktop application which scrapes data from different online platforms and stores them in the company's platform. I worked as a solo developer using Python, PyQT, Pyppeteer, BeautifulSoup, developing and updating the platform as needed.

Premium ESOWP Limited, Awka Nigeria   **Full-stack Developer (May 2023 – April 2024)**

Worked as a full-stack developer, mainly on the frontend side. Collaborated with the UI/UX/graphics guys and the backend guys to always satisfy our clients' needs. I and the teams developed websites for different schools and businesses to help automate most of their operations. I worked with HTML, CSS, JavaScript, jQuery, Bootstrap, React.js, PHP and Python as needed, while developing on the job as well.

UltrexGold Management   **React.js, Node.js, Express.js, Redux, MongoDB**

Built a finance management application for an individual who was having issues managing his business. He needed assistance with the management of the business, monitoring all the activities that goes on in the business, and investing the income. His business consistently grew by about 5% every month of judicious use of the app.
